Is The Word For Lighting Fixments

Electrical illumination is taken for granted in our present day world—yet it is strictly a 20th century product. And despite its rapid development, only in recent years has its possibilities for home decoration been appreciated.

It is axiomatic today that a comfortable, interesting home is impossible without good lighting. The beauty of furnishings, the rich colorings of drapes and rugs so painstakingly selected, are all rendered flat and lifeless without the vitalizing effect of proper illumination.

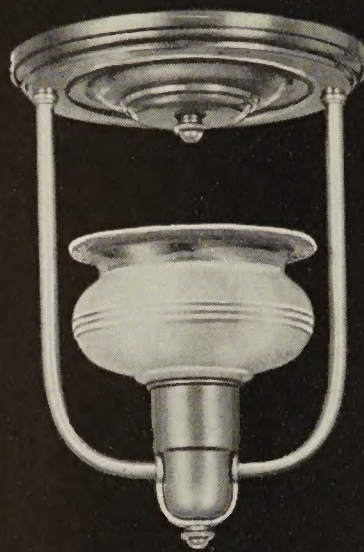

The function of the Lighting Fixture as a light source attracts the eye and thus gives the fixture outstanding prominence in the decorative scheme. It follows that no expenditure on your home will bring so much return in comfort and decoration as a proper selection of Lighting Fixtures.

The pages which follow give concrete expression to the "Radiant" precepts that the Lighting Fixture can be beautiful as well as useful, and that these elements can be built into products meant for the conservative budget. Fine proportions, sturdy construction and beautiful lasting finishes, make these Radiants perfect complements to the present day home.

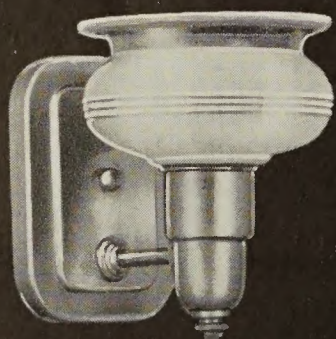

Their cost is low—their value high.
